

HANDLING MANUAL
HPS40 4+2
Female Connector MCC

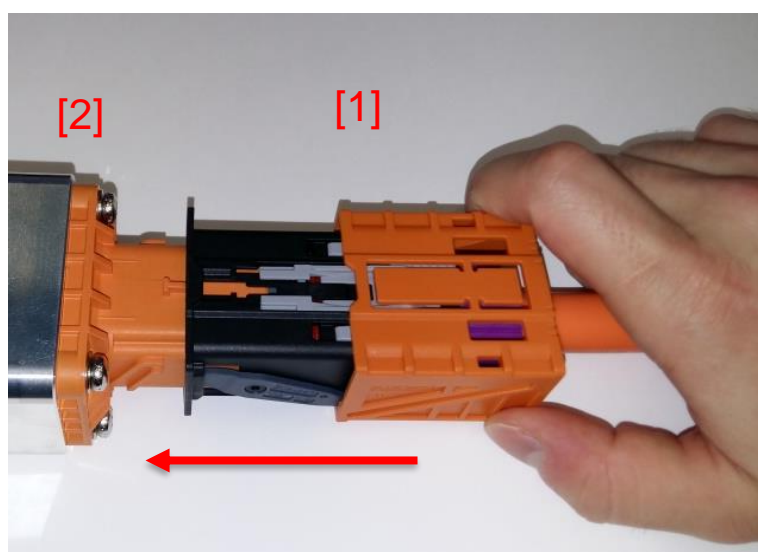

HIRSCHMANN
AUTOMOTIVE

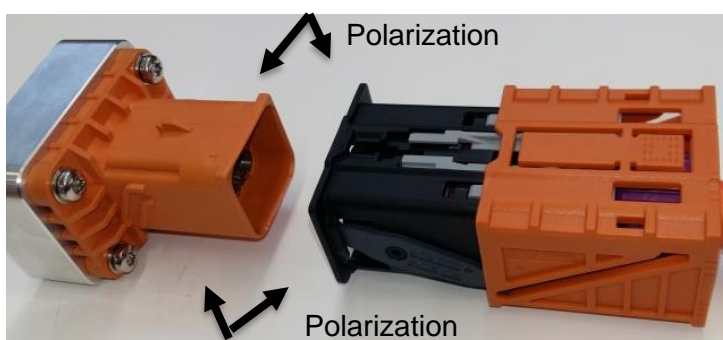

1 Handling manual - plugging

1.1 Step 1

Collar the connector [1] to the mating side [2] and insert the connector.

TIPP:

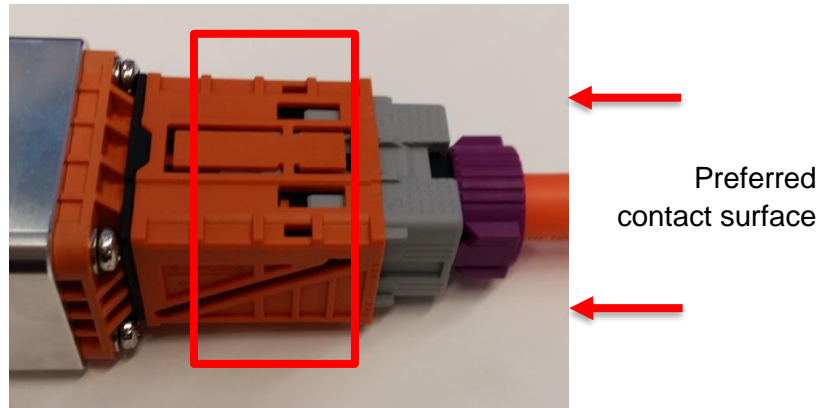

Consider the correct orientation/
alignment of the polarization.

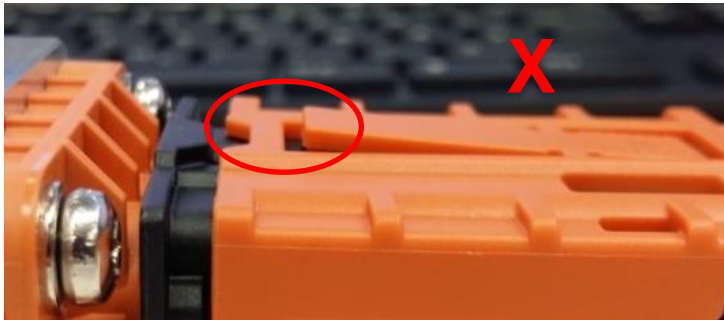

1.2 Step 2

Push on the plug with force until the catch snaps in.

TIPP:

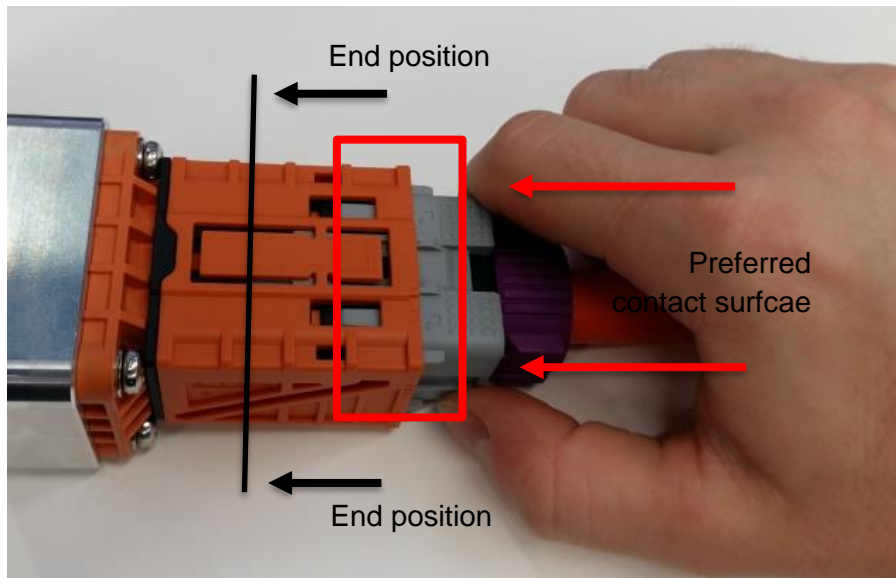

If the connector is not at the final position, the locking hook stays outside. Movement of the CPA (grey part) is not possible.

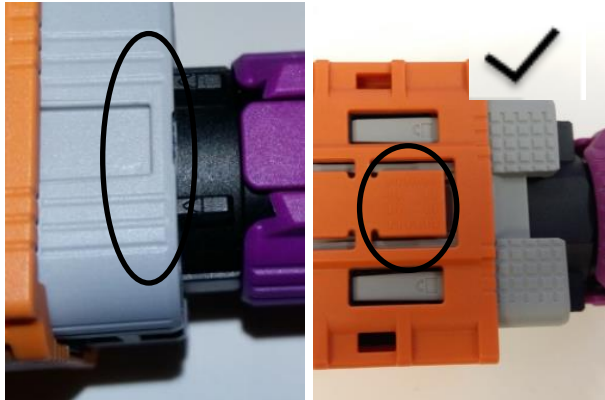

1.3 Step 3

Push CPA (grey part) forward until it engages, and the closed lock is visible.

TIPP:

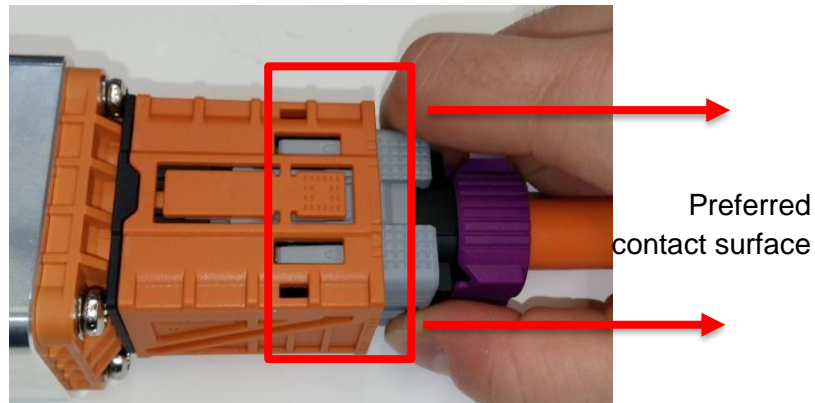

The CPA (grey part) is closed when the closed lock and arrows are visible.

2 Handling manual - disconnect

2.1 Step 1

Pull back CPA (grey part) until it snaps in, and the open lock is visible.

TIPP:

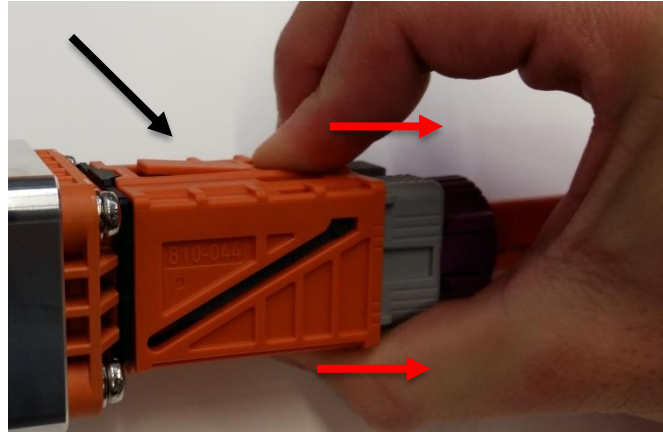

Pulling back by holding at marked area on both sides simultaneously.

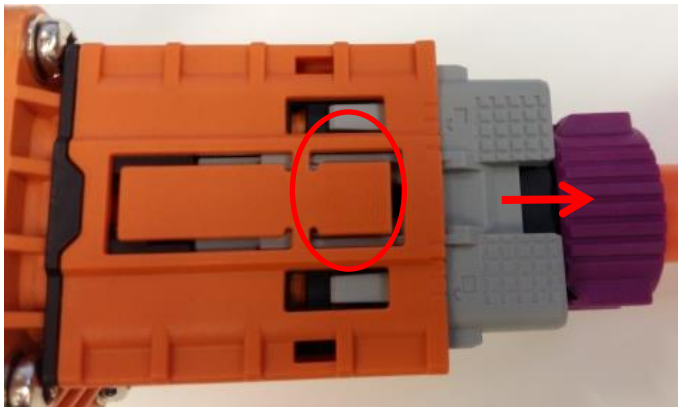

2.2 Step 2

Press the clicks and hold in this position. Remove the plug.

TIPP:

Pressing area of the locking hook on both sides.
